SUBJECT INDEX

Canadian Journal of Soil Science, Volume 71, 1991

- Acid forest soils
 errors in CEC determination due to weathering, 155
- Acid soils
 iron status of PEI crops, 197
- Air porosity
 water properties of Tanzanian soils, 1
- Alcaloides totaux
 fertilisation magnésienne du tabac à cigarette, 355
- Alfalfa
 lower limit of available water for wheat and forage crops, 247
 plant availability of soil Zn fractions, 507
- Aluminum
 errors in CEC determination due to weathering, 155
 titratable acidity of organo-mineral complexes, 285
- Amino acids
 crop rotation effects on soil organic matter, 377
- Ammonium nitrate
 N fertilizer management for winter wheat, 177
- Amorphous material
 water properties of Tanzanian soils, 1
- Apple
 long term liming effects in orchards, 545
- ATP-sulphurylase
 effect of humic substances on sulphate assimilation, 239
- Autotrophic sulfur oxidizers
 sulfur-oxidizing populations in Saskatchewan soils, 127
- Availability
 distribution and availability of soil Cu fractions, 89
- Available soil water
 soil water and stomatal conductance in relation to irrigation, 253
- Available water
 water properties of Tanzanian soils, 1
- Bacterium
 degradation of 2,4-D waste by a soil bacterium, 243
- Barley
 crop response to elemental S, 213
 effect of poultry manure on trace element uptake by forage, 305
- Biological activity
 biological actions in B horizons of Podzolic soils, 485
- Bog
 subsurface water movement and methane, 427
- Boreal forest
 Gray Luvisol pedogenesis and phosphorus, 397
- C respiration
 crop rotation effects on soil organic matter, 377
- Canola
 crop response to elemental S, 213
- Carbon-14 datings
 biological actions in B horizons of Podzolic soils, 485
- Cation exchange
 errors in CEC determination due to weathering, 155
- Cereals
 iron status of PEI crops, 197
- Chamber measurements
 variability of soil respiration, 189
- Chlorophyll
 effect of humic substances on sulphate assimilation, 239
- Clay content
 distribution and availability of soil Cu fractions, 89
- Clusters
 microaggregate formation, 465
- CO₂ flux
 variability of soil respiration, 189
- Compost
 chemical and biochemical changes in composts, 475
- Conductivité hydraulique
 infiltrometre a charge constante, 119
- Continuous use
 long-term use of 2,4-D and MCPA on wheat, weeds, and soil, 73
- Copper fractions
 distribution and availability of soil Cu fractions, 89
- Corn (*Zea mays* L.)
 chemical and biochemical changes in composts, 475
- Crop residues
 cultural practices on soil biochemical properties, 363

- Crop rotations
cultural practices on soil biochemical properties, 363
effect of cultural practices on soil organic matter, 43
runoff and soil loss in the Peace River region, 533
- Crops
N application on crop/cultivars, 227
- Cryoturbation
soil structure of Turbic Cryosols, 11
- Cultivars
N application on crop/cultivars, 227
- Degradation
degradation of 2,4-D waste by a soil bacterium, 243
- Densité de prospection
fiabilité d'une étude pédologique détaillée, 339
- Desorption
sorption/desorption of ortho- and pyrophosphate, 327
- Distribution
distribution and availability of soil Cu fractions, 89
- DTPA-extractable Cu
distribution and availability of soil Cu fractions, 89
- Échantillonnage
variabilité des sols et stratégie d'échantillonnage, 439
- Erosion
intercropping for soil erosion control, 137
- Erosion plots
runoff and soil loss in the Peace River region, 533
- Exchangeable acidity
errors in CEC determination due to weathering, 155
- Extracellular polysaccharides
microaggregate formation, 465
- Faba beans (*Vicia faba* L.)
chemical and biochemical changes in composts, 475
- Fallow management
cultivated fallows in humid Africa, 147
- Fertilization
crop rotation effects on soil organic matter, 377
- Fertilizer effects
effect of cultural practices on soil organic matter, 43
- Fiabilité
fiabilité d'une étude pédologique détaillée, 339
- Field estimate
water properties of Tanzanian soils, 1
- ¹⁵N-labelled fertilizer
early harvested potatoes and ¹⁵N-labelled fertilization, 519
- Forages
iron status of PEI crops, 197
- Forme
fertilisation magnésienne du tabac à cigarette, 355
- Frozen vs. unfrozen soil
denitrification at low soil temperatures, 293
- Geographic information systems
GIS to integrate soil site and area data, 389
- Gliricidia sepium*
cultivated fallows in humid Africa, 147
- Grain yields
N fertilizer management for winter wheat, 177
- Grass
lower limit of available water for wheat and forage crops, 247
- Grazing
grazing impacts on soil water in Alberta rangelands, 313
- Green manures
crop rotation effects on soil organic matter, 377
- Harvest periods
early harvested potatoes and ¹⁵N-labelled fertilization, 519
- Heterotrophic sulfur oxidizers
sulfur-oxidizing populations in Saskatchewan soils, 127
- Humic substances
effect of humic substances on sulphate assimilation, 239
- Hydrogen
errors in CEC determination due to weathering, 155
- Indurated horizon
impact of a volcanic ash layer on soil properties, 495
- Infiltrometre
infiltrometre a charge constante, 119
- Kriging
soil sampling schemes for geostatistical analyses, 165

- Ladino clover
 effect of poultry manure on trace element uptake by forage, 305
- Leaf nutrition
 wastewater irrigation of sweet cherry, 31
- Legumes
 effect of cultural practices on soil organic matter, 43
- Lime application
 long term liming effects in orchards, 545
- Lower limit of available water
 lower limit of available water for wheat and forage crops, 247
- Luvissols
 P solubility and retention, 453
- Magnésium
 fertilisation magnésienne du tabac à cigarette, 355
- Maize
 effect of humic substances on sulphate assimilation, 239
- Methane
 subsurface water movement and methane, 427
- Méthode de prospection des sols
 fiabilité d'une étude pédologique détaillée, 339
- Microaggregates
 microaggregate formation, 465
- Microbial degradation
 long-term use of 2,4-D and MCPA on wheat, weeds, and soil, 73
- Microflora
 chemical and biochemical changes in composts, 475
- Micromorphology
 biological actions in B horizons of Podzolic soils, 485
 nodules in Alberta Podzols, 411
 soil structure of Turbic Cryosols, 11
- Micronutrients
 effect of poultry manure on trace element uptake by forage, 305
- Mineral determination
 nodules in Alberta Podzols, 411
- Navy beans
 distribution and availability of soil Cu fractions, 89
 plant availability of soil Zn fractions, 507
- Nitrite production
 denitrification at low soil temperatures, 293
- Nitrogen
 N application on crop/cultivars, 227
- Nitrogen fertilization
 early harvested potatoes and ^{15}N -labelled fertilization, 519
- Nitrogen use efficiency
 early harvested potatoes and ^{15}N -labelled fertilization, 519
- No-till
 response of no-till winter wheat to seed-placed N, 55
- Nutrient cycling
 Gray Luvisol pedogenesis and phosphorus, 397
- O-acetylserine sulphydrilase
 effect of humic substances on sulphate assimilation, 239
- Orchardgrass
 effect of poultry manure on trace element uptake by forage, 305
- Organic soils
 admixing mineral sublayers of organic soils, 101
- Organo-mineral complexes
 titratable acidity of organo-mineral complexes, 285
- Orthophosphate
 sorption/desorption of ortho- and pyrophosphate, 327
- Oxidation
 short-term and residual value of elemental S, 203
- Phosphorus retention
 P solubility and retention, 453
- Peat moss
 chemical and biochemical changes in composts, 475
- Permeametre
 infiltrometre a charge constante, 119
- pH
 plant availability of soil Zn fractions, 507
- Phenoxies
 long-term use of 2,4-D and MCPA on wheat, weeds, and soil, 73
- Phosphorus losses
 Gray Luvisol pedogenesis and phosphorus, 397
- Plant availability
 plant availability of soil Zn fractions, 507
 short-term and residual value of elemental S, 203
- Plant iron
 iron status of PEI crops, 197
- Plant population
 N fertilizer management for winter wheat, 177
- Podzol
 biological actions in B horizons of Podzolic soils, 485

- Potato
early harvested potatoes and ^{15}N -labelled fertilization, 519
- Potential mineralizable N
effect of cultural practices on soil organic matter, 43
- Potentiometric titrations
titratable acidity of organo-mineral complexes, 285
- Précision
fiabilité d'une étude pédologique détaillée, 339
variabilité des sols et stratégie d'échantillonnage, 439
- Prewetting techniques
aggregate prewetting and stability, 67
- Protein
N fertilizer management for winter wheat, 177
response of no-till winter wheat to seed-placed N, 55
- Prunus avium* L.
wastewater irrigation of sweet cherry, 31
- Prunus persica*
soil water and stomatal conductance in relation to irrigation, 253
- Pureté
fiabilité d'une étude pédologique détaillée, 339
- Pyrophosphate
sorption/desorption of ortho- and pyrophosphate, 327
- Rainfall simulation
intercropping for soil erosion control, 137
- Rangelands
grazing impacts on soil water in Alberta rangelands, 313
- Reacidification
long term liming effects in orchards, 545
- Related distribution pattern
nodules in Alberta Podzols, 411
- Relative molar distribution
crop rotation effects on soil organic matter, 377
- Residual
crop response to elemental S, 213
- Residual effect
short-term and residual value of elemental S, 203
- Residue
intercropping for soil erosion control, 137
degradation of 2,4-D waste by a soil bacterium, 243
- Rhizosphere
microaggregate formation, 465
- Rotation
crop response to elemental S, 213
- Runoff
intercropping for soil erosion control, 137
runoff and soil loss in the Peace River region, 533
- Sulfur fertilizer
crop response to elemental S, 213
short-term and residual value of elemental S, 203
- Sawdust
chemical and biochemical changes in composts, 475
- Seed-placed N
response of no-till winter wheat to seed-placed N, 55
- Soil
degradation of 2,4-D waste by a soil bacterium, 243
- Soil aggregation
admixing mineral sublayers of organic soils, 101
- Soil biochemical activities
long-term use of 2,4-D and MCPA on wheat, weeds, and soil, 73
- Soil density
soil sampling schemes for geostatistical analyses, 165
- Soil formation
Gray Luvisol pedogenesis and phosphorus, 397
- Soil loss
runoff and soil loss in the Peace River region, 533
- Soil map
GIS to integrate soil site and area data, 389
- Soil pH
iron status of PEI crops, 197
- Soil properties
impact of a volcanic ash layer on soil properties, 495
sulfur-oxidizing populations in Saskatchewan soils, 127
- Soil quality
cultural practices on soil biochemical properties, 363
effect of cultural practices on soil organic matter, 43
wastewater irrigation of sweet cherry, 31
- Soil respiration
variability of soil respiration, 189
- Soil restoration
cultivated fallows in humid Africa, 147
- Soil sites
GIS to integrate soil site and area data, 389
- Soil structure
soil structure of Turbic Cryosols, 11

- Soil structure stability
admixing mineral sublayers of organic soils, 101
- Soil ultrastructure
microaggregate formation, 465
- Soil water
grazing impacts on soil water in Alberta rangelands, 313
- Solodic soils
P solubility and retention, 453
- Solubility
P solubility and retention, 453
- Soluble salt movement
impact of a volcanic ash layer on soil properties, 495
- Sorption
sorption/desorption of ortho- and pyrophosphate, 327
- Specific respiratory activity
cultural practices on soil biochemical properties, 363
- Square root model
denitrification at low soil temperatures, 293
- Stomatal conductance
soil water and stomatal conductance in relation to irrigation, 253
- Sucres réducteurs
fertilisation magnésienne du tabac à cigarette, 355
- Sulfur oxidation
sulfur-oxidizing populations in Saskatchewan soils, 127
- Tabac à cigarette
fertilisation magnésienne du tabac à cigarette, 355
- Taux
fertilisation magnésienne du tabac à cigarette, 355
- Taxon
variabilité des sols et stratégie d'échantillonnage, 439
- Threshold temperature
denitrification at low soil temperatures, 293
- Time of N application
N application on crop/cultivars, 227
- Titratable acidity
titratable acidity of organo-mineral complexes, 285
- Turbic Cryosol
soil structure of Turbic Cryosols, 11
- 2,4-D
degradation of 2,4-D waste by a soil bacterium, 243
- Unité cartographique
variabilité des sols et stratégie d'échantillonnage, 439
- Uptake
crop response to elemental S, 213
- Urea
N fertilizer management for winter wheat, 177
- Vacuum wetting
aggregate prewetting and stability, 67
- Variabilité des sols
variabilité des sols et stratégie d'échantillonnage, 439
- Variability
variability of soil respiration, 189
- Variogram
soil sampling schemes for geostatistical analyses, 165
- Volcanic-ash
impact of a volcanic ash layer on soil properties, 495
- Wastewater irrigation
wastewater irrigation of sweet cherry, 31
- Water uptake
grazing impacts on soil water in Alberta rangelands, 313
- Water movement
impact of a volcanic ash layer on soil properties, 495
subsurface water movement and methane, 427
- Weathering
errors in CEC determination due to weathering, 155
Gray Luvisol pedogenesis and phosphorus, 397
- Weed populations
long-term use of 2,4-D and MCPA on wheat, weeds, and soil, 73
- Wet aggregate stability
aggregate prewetting and stability, 67
- Wheat
lower limit of available water for wheat and forage crops, 247
- Wheat production
long-term use of 2,4-D and MCPA on wheat, weeds, and soil, 73
- Winter wheat
response of no-till winter wheat to seed-placed N, 55
- Winter survival
response of no-till winter wheat to seed-placed N, 55
- Wood shavings
chemical and biochemical changes in composts, 475

- | | |
